EDUCATION

Major : Software Engineering

Ho Chi Minh City University of Technology

2022 - 2026 (Expected)

- GPA : 3.39/4.0

HONORS & AWARDS

2024-2025

Outstanding Student of the Year

SKILLS

DevOps:
Docker, Docker Compose, CI/CD, GitLab CI, Nginx, Linux/Ubuntu, Cloudflare.

Cloud:
AWS: EC2, VPC, IAM, S3, EBS, RDS, ElastiCache, CloudFront, Route 53, CloudWatch, AWS Backup; **Azure.**

Development:
JavaScript, TypeScript, ReactJS, Spring Boot, Node.js, RESTful API.

Database:
MySQL, PostgreSQL.

Tools:
Git, GitHub, GitLab, Postman, Swagger.

AI Tools:
ChatGPT, Gemini, Claude, Antigravity...

PROFESSIONAL TRAINING

Apr 2026 - Jul 2026

Amazon Web Services (AWS) Vietnam
First Cloud AI Journey (FCAJ) – Cloud & DevOps Bootcamp

- Completed an intensive hands-on bootcamp covering AWS Cloud, Linux, Docker, networking, and infrastructure deployment.
- Provisioned and configured AWS services including **EC2, VPC, IAM, S3, RDS, CloudFront, Route 53, ElastiCache, and CloudWatch...** through practical labs.
- Collaborated in a 6-member team to develop and deploy the **Genzite** capstone project, contributing to frontend development, application deployment, and AWS environment configuration.

PROJECTS

Feb 2026 - Mar 2026 **Position: Full-stack / DevOps**

Task Management

Description: A full-stack task management application developed as a practical environment for containerization, CI/CD, Linux server administration, reverse proxy, SSL, and application deployment.
Project size: Personal Projects
Responsibilities:

- Developed a full-stack task management application using **React, Spring Boot, and MySQL**.
- Configured an **Ubuntu Linux server** and deployed the containerized application.
- Configured **Nginx as a reverse proxy** to route traffic between the public domain and application containers.
- Built a GitLab CI/CD pipeline to automate Docker image building, registry publishing, and application deployment.
- Configured **Let's Encrypt SSL with Certbot** for HTTPS access.
- Configured **Cloudflare** for DNS and proxy management.

Tech Stack: React, Spring Boot, MySQL, Docker, Docker Compose, GitLab CI/CD, Ubuntu, Nginx
GitHub: github.com/PHung112/TaskManagement

May 2026 - July2026

Position: Frontend Developer / Cloud Deployment Contributor

Genzite – AI-Powered No-Code Platform

Description: An AI-powered no-code platform that enables non-technical users to build, customize, and publish responsive websites through a drag-and-drop editor and dynamic CMS.
Project size: 6 members
Responsibilities:

- Supported the development of responsive user interfaces using **React, TypeScript, and Tailwind CSS**.
- Configured **Docker-based deployment** for the frontend and assigned backend microservices.
- Supported the configuration and deployment of **Site, Media, and Notification services** on **AWS EC2 running Ubuntu Linux**.
- Configured assigned AWS resources including **EC2, EBS, RDS PostgreSQL, ElastiCache Redis, and AWS Backup**.
- Created the project architecture diagram to visualize services, AWS infrastructure, and deployment flow.

Tech Stack: React, TypeScript, Tailwind CSS, Docker, AWS, EC2, EBS, RDS PostgreSQL, ElastiCache Redis, Ubuntu Linux
Github: github.com/KrisCTer/Genzite

May 2025 - Dec 2025

Position: Frontend Developer

Document Sharing Platform

Description: Student document-sharing platform with authentication, document management, subscription, and administration features.
Project size: 3 members
Responsibilities:

- Developed document management, Firebase Authentication, subscription, and admin dashboard features.
- Developed a document management system supporting multi-step uploads, client-side compression, and PDF preview to improve user experience..
- Optimized frontend performance using lazy loading, debouncing, and memoization.
- Manually deployed the application to Azure.

Tech Stack: React, Vite, C#, REST API, Firebase, Azure Blob Storage
Github:

- Backend: github.com/Felix5124/DocumentSharingAPI
- Frontend: github.com/Felix5124/document-sharing-frontend

SOFT SKILLS

Self-learning · Communication · Teamwork · Responsibility · English Technical Documentation
